SUMMARY

Mobile & Frontend Engineer with 4+ years of experience building and leading production applications across React Native, React.js, Next.js, and Node.js. Experienced in designing scalable application architectures, developing cross-platform mobile applications, integrating REST APIs and third-party services, and optimizing application performance. Strong hands-on experience with Firebase, Stripe, Redux, TypeScript, and cloud technologies, with experience leading teams, conducting code reviews, and driving technical decisions from development through production.

PROFESSIONAL EXPERIENCE

Senior Software Engineer, *Nodelays | React Native | React.js | Next.js | Node.js | JavaScript | TypeScript*
- Development of mobile and web applications using React Native, React.js, Next.js, Node.js, JavaScript, and TypeScript, with a focus on performance, scalability, and maintainability.
- Designed application architecture, project structure, reusable components, and shared modules while making technical decisions around development patterns and technology choices.
- Worked across React Native, React.js, Next.js, and Node.js projects, handling system design, performance optimization, complex technical issues, and end-to-end feature delivery.
- Worked with product, design, QA, and engineering teams on requirements, code quality, technical guidance, and development best practices.

Software Engineer, *nodlays | React Native | JavaScript | TypeScript*
- Developed and maintained production React Native applications, including reusable components, navigation, authentication, forms, and complex mobile features.
- Integrated Node.js APIs, REST APIs, and third-party services while working closely with backend developers to deliver application features.
- Worked on application performance, debugging, and resolving technical issues across different devices and platforms.
- Handled features throughout development, testing, deployment, and maintenance while contributing to code reviews and improving application architecture and development practices.

Associate Software Engineer, *techpert | React Native*
- Developed cross-platform mobile applications using React Native, JavaScript, and TypeScript, including reusable UI components, navigation flows, forms, and interactive features.
- Integrated REST APIs and third-party services and worked with state management to build reliable and responsive applications.
- Worked with senior developers, designers, and QA teams to implement, test, and deliver product features.
- Debugged application issues, improved performance, and contributed to maintaining code quality and consistent development practices.

SKILLS

Mobile App
React Native CLI, Expo, EAS (Expo Application Services)

Backend
Node.js, Express js, serverless

DevOps & Cloud
AWS (EC2, bucket), CI/CD

Frontend
JavaScript (React js, Next js, TypeScript, Redux, ES6), HTML5, CSS3

Database
MySQL, MongoDB

Tools & Other
Git, React Native, React Profiler, Code Splitting, Lazy Loading

EDUCATION

BS Computer science, *PMAS-AAUR (Arid Agriculture University)* 2017 – 2021

PROJECTS

Carbon Confession – Carbon Offset & Donation Mobile App,
React Native | Expo | Firebase | Stripe | Redux Toolkit | iOS & Android
Calculate your carbon footprint, pay to offset your daily "sins," and earn shareable "forgiven" badges. Turn eco-guilt into action while supporting real environmental projects—with a fun, ironic twist.

- Developed a cross-platform mobile app for **carbon footprint calculation and emission offset donations**.
- Integrated **Stripe** for payments and **Firebase** for authentication, database, and push notifications.
- Built carbon footprint calculators with **dynamic pricing**, donation history, receipts, and social sharing.
- Managed **iOS and Android** builds and releases through App Store Connect and Google Play Console.

Cohere – Coaching & Consulting Mobile Application,
React Native | TypeScript | Firebase | Real-time Communication | iOS & Android
Cohere is an all-in-one business management and community platform built specifically for coaches, healers, and service providers to run, market, and scale their practices.

- Developed and maintained cross-platform mobile applications using **React Native**, building reusable and responsive UI components.
- Integrated **REST APIs, Firebase, and FCM** for data handling, authentication, real-time features, and push notifications.
- Implemented **real-time chat and Twilio** features including voice/video calling and messaging.
- Fixed bugs, improved app performance, and managed **iOS and Android** releases.

Chetibra, *React Native CLI | Firebase | Notification | redux | mapbox |Axios*
Chetibra is a community app built for cyclists to connect, ride, and share their passion for the road. Create events, share routes, challenge friends, and discover new itineraries with fellow cyclists.

- Developed **Chetibra**, a React Native mobile app with **REST APIs, Redux, and Mapbox** for location-based features.
- Integrated **Firebase Firestore** for real-time chat, message synchronization, and push notifications.
- Implemented **deep linking** for smooth navigation between app screens and shared links.
- Worked on performance improvements, bug fixes, and overall app stability across **iOS and Android**.
